Summary

I'm a full-stack developer, specializing in front-end development working with cutting-edge JavaScript frameworks. I have a keen eye for user experience and design. Seeking new opportunities as a developer working with a team.

Technical Skill

Front End: React/Redux, Vanilla JavaScript, ES6, HTML, CSS/SASS, CSS-in-JS, Wordpress
Server Side: NodeJS, MongoDB, PHP, MySQL, AWS S3, LAMP, nginx
Workflow: JIRA, Git/Github, Webpack, Jest, Travis CI

Work Portfolio

Smartcar: Led development and implementation for the client's new homepage.
Mesosphere DC/OS Docs - Implemented responsive layout and design. Developed custom functionality in the build process and search indexing.
Olympic Channel: Interactive Torch - Implemented responsive design and animation.
Olympic Channel: Become the Light - Led development and implementation of the landing site.
Doyle Salewski - Implemented responsive design. Developed modular components for Prismic's CMS.
Navi - A calendar showcasing life events. Built with React, Redux, Nodejs and MongoDB.
K-Pop Recap - A news aggregator scraping multiple news sources. Built with Nodejs and MongoDB.
