Summary

I am a full-stack web developer, specializing in front-end development working with cutting-edge JavaScript frameworks. I have a keen eye for user experience and design. I'm looking for new opportunities working with a team as a web developer.

Technical Skill

Front End: React/Redux, Vanilla JavaScript, ES6, HTML, CSS/SASS, CSS-in-JS, Wordpress
Server Side: NodeJS, MongoDB, PHP, MySQL, AWS S3, LAMP, nginx
Workflow: JIRA, Git/Github, Webpack, Jest, Travis CI

Recent Work

Smartcar: Led development and implementation for the client's upcoming homepage.
Mesosphere DC/OS Docs - Implemented responsive designs and user-facing features. Developed custom functionality for build process and search indexing.
Olympic Channel: Interactive Torch - Implemented responsive design and animations.
Olympic Channel: Become the Light - Led development and implementation of the landing site.

Experience

Ettrics   Ottawa, Canada (Remote)
Full-Stack Developer   *July 2017 - January 2018*

- Developed front-end for client applications using modern web development technologies.
- Planned and scoped client products with Lead Developer.
- Lead in development and implementation of several small scale client projects.
- Helped develop company's build process for client projects.
- Collaborated with development and design teams.

Freelance Web Developer   2010 - Present
- Work with clients developing front-end and back-end applications.
- Managing client's servers on LAMP stack with reverse proxy.

Education
